Enwrapped on the north and west by the L-shaped "Swimmer's Bath House" (building 102), the "Swimming Pool" was built by the Army at the westernmost edge of Block A. The pool is identified on maps as being part of the "Recreation Facilities," most of which were built in 1943 to accommodate the 2,000 civilians and 17,500 military employees. It is of "Mobilization" construction type. The pool is shown on the September, 1944, base map, with the bath house improperly depicted at its northeast corner.

The swimming pool is a rectangular, concrete-lined basin with sidewalls tapering from top to bottom at about a 30 degree angle. The main pool measures 69 feet by 82 feet-6 inches, while the wading pool is 12 feet by 15 feet. The main pool's long dimension runs north to south. Surrounded on all four sides by a concrete walk/sunning deck, the pool is also accessed by two concrete stairways with metal handrails, both located at the corners of the north end of the pool. Although not in use for many years, the swimming pool remains in good condition.
